DENTSPLY SIRONA Inc.
Conflict Minerals Report
For the Year Ended December 31, 2025

Company Overview

This report has been prepared by the management of DENTSPLY SIRONA Inc. (herein referred to as the “Company”, “Dentsply Sirona”, “we”, “us”, or “our”). The information includes the activities of all majority-owned subsidiaries and variable interest entities that are required to be consolidated.

The Company is the world’s largest diversified manufacturer of professional dental products and technologies, with a 139-year history of innovation and service to the dental industry and a vision of improving oral health and continence care globally. Dentsply Sirona develops, manufactures, and markets comprehensive solutions, including technologically-advanced dental equipment supported by cloud-enabled software solutions as well as dental products and healthcare consumable products in urology and enterology under a strong portfolio of world class brands. Dentsply Sirona’s innovative products provide high-quality, effective, and connected solutions to advance patient care and deliver better, safer, and faster dentistry. Dentsply Sirona’s worldwide headquarters is located in Charlotte, North Carolina. The Company’s shares of common stock are listed in the United States on the Nasdaq stock market under the symbol XRAY.

Introduction

This Conflict Minerals Report for the period from January 1, 2025 to December 31, 2025 is presented to comply with Rule 13p-1 under the Securities Exchange Act of 1934, as amended, and Form SD (the “Rule”). The Rule was adopted to implement reporting and disclosure requirements related to conflict minerals as directed by the Dodd-Frank Wall Street Reform and Consumer Protection Act. The Rule imposes reporting obligations on Securities and Exchange Commission (“SEC”) registrants whose manufactured products contain certain minerals that are necessary to the functionality or production of their respective products.

If a registrant determines that any columbite-tantalite (coltan), cassiterite, gold, wolframite or their derivatives, which are limited to tantalum, tin and tungsten (the “Subject Minerals” or “3TGs”), are necessary to the functionality or production of a product manufactured by the registrant or contracted by the registrant to be manufactured, the registrant must conduct in good faith a Reasonable Country of Origin Inquiry (“RCOI”) regarding those Subject Minerals that is reasonably designed to determine whether any of the Subject Minerals originated in the Democratic Republic of the Congo or an adjoining country (the “Covered Country” or “Covered Countries”) or are from recycled or scrap sources.

If, following the completion of the RCOI, a registrant knows that any of the necessary Subject Minerals originated in a Covered Country and are not from recycled or scrap sources, or has reason to believe that any of its necessary Subject Minerals may have originated in the Covered Countries and has reason to believe that its necessary Subject Minerals did not come from recycled or scrap sources, then the registrant must exercise due diligence on the source and chain of custody of the Subject Minerals that conforms to a nationally or internationally recognized due diligence framework and describe such due diligence in this separate Conflict Minerals Report.

In accordance with the Organisation for Economic Co-operation and Development Guidance for Responsible Supply Chains of Minerals from Conflict-Affected and High-Risk Areas, Third Edition, the related supplements on tin, tungsten, tantalum and gold (the “OECD Guidance”) and the Rule, this Conflict Minerals Report is available on the Company’s Investor Relations website at <https://investor.dentsplysirona.com/financial-information/filings-reports>.

Consistent with the provisions of the Rule, the SEC’s Statement on the Effect of the Recent Court of Appeals Decision on the Conflict Minerals Rule, dated April 29, 2014; the SEC’s Order Issuing Stay, dated May 2, 2014; and the SEC’s Updated Statement on the Effect of the Court of Appeals Decision on the Conflict Minerals Rule, dated April 7, 2017, this Conflict Minerals Report has not been audited by a third party.

Conflict Minerals Program & Policy

The Company has actively engaged with its customers and suppliers for years with respect to the use of conflict minerals. Dentsply Sirona adopted a conflict minerals policy articulating the conflict minerals supply chain due diligence process and the Company’s commitments to reporting obligations regarding conflict minerals. The policy is available online, and can be found here:

<https://www.dentsplysirona.com/content/dam/master/corporate/legal/CORP-Code-of-Ethics-and-Business-Conduct.pdf>

RCOI and Due Diligence Framework

To determine whether necessary 3TGs in products originated in Covered Countries, the Company retained 3E, a third-party service provider, to assist in reviewing the supply chain and identifying risks. The Company provided a list composed of suppliers and parts associated with the in-scope products to 3E.

To collect data on the sources of origin of the materials procured by the supply chain, the Company utilized the Conflict Minerals Reporting Template (“CMRT”) version 6.31 or higher to conduct a survey of all in-scope suppliers.

During the supplier survey, Dentsply Sirona and 3E contacted suppliers via 3E Insight, a software-as-a-service (“SaaS”) platform provided by 3E that enables users to complete and track supplier communications and allows suppliers to upload completed CMRTs directly to the platform for validation, assessment and management. The Insight portal also provides functionality that meets the OECD Guidance process expectations by evaluating the quality of each supplier response and assigning a health score based on the supplier’s declaration of process engagement. Additionally, the metrics provided in this report, as well as the step-by-step process for supplier engagement and upstream due diligence investigations performed are managed through this platform.

3E monitored and tracked all communications in the 3E Insight portal for future reporting and transparency. Dentsply Sirona directly contacted suppliers that were unresponsive to 3E’s communications during the diligence process and requested these suppliers complete the CMRT and submit it to 3E.

The Company’s program continues to include automated data validation on all submitted CMRTs. The goal of data validation is to increase the accuracy of submissions and identify any contradictory answers in the CMRT. This data validation is based on questions within the declaration tab of the CMRT which helps to identify areas that require further classification or risk assessment, as well as understand the due diligence efforts of the Tier 1 suppliers. The results of this data validation contribute to the program’s health assessment and are shared with the suppliers to ensure they understand areas that require clarification or improvement.

All submitted forms are accepted and classified as valid or invalid so that data is retained. Suppliers are contacted regarding invalid forms and are encouraged to submit a valid form. Suppliers are also provided with guidance on how to correct these validation errors in the form of feedback to their CMRT submission, training courses and direct engagement help through 3E’s multilingual Supplier Experience team. Since some suppliers may remain unresponsive to feedback, Dentsply Sirona tracks program gaps to account for future improvement opportunities.

As of May 11, 2026, there were 510 suppliers in scope of the conflict minerals program and 262 provided a completed CMRT. The Company’s total response rate for this reporting year was 51.37%.

Based on the findings through the RCOI process, the Company was able to determine the countries of origin for a large portion of the 3TGs in its products. As such, the Company continued to perform further due diligence on the source and chain of custody of the minerals in question.

Design of Due Diligence

Dentsply Sirona designed its due diligence measures to conform, in all material respects, with the framework in the OECD Guidance and the related supplements. The program aligns with the five steps for due diligence that are described by the OECD Guidance and the Company continues to evaluate market expectations for data collection and reporting to achieve continuous improvement opportunities.

Due diligence requires the Company's necessary reliance on data provided by direct suppliers and third-party audit programs. There is a risk of incomplete or inaccurate data as the process cannot fully be owned by the Company. However, through continued outreach and process validation, our program aligns with industry standards and market expectations for due diligence by downstream companies.

Due Diligence Performed

1) Establish Strong Company Management Systems

Conflict Minerals Policy

Dentsply Sirona is committed to the responsible sourcing of conflict minerals. It supports the humanitarian goal of ending violent conflict in the Covered Countries and thus established a Conflict Minerals Policy Statement, which is incorporated in Dentsply Sirona's Business Partner Code of Conduct.

Internal Management System

Dentsply Sirona established a cross-functional Conflict Minerals Compliance Team led by the Program Manager of Procurement Sustainability. The Conflict Minerals Compliance Team is responsible for implementing the conflict minerals compliance strategy and briefing senior management about the results of these due diligence efforts.

Dentsply Sirona also uses a third-party service provider, 3E, to assist with evaluating supply chain information regarding 3TGs, identifying potential risks, and in the development and implementation of additional due diligence steps that the Company will undertake with suppliers in regards to conflict minerals.

The Company leverages 3E's Managed Services in order to work with dedicated program specialists who support Dentsply Sirona's conflict minerals program. The Company communicates regularly with the 3E team in order to receive updates on program status. Members of 3E's Customer Success team are trained in conflict minerals compliance and understand the intricacies of the CMRT and conflict minerals reporting, as well as Section 1502 of the Dodd-Frank Act.

System of Controls and Transparency

Dentsply Sirona expects all suppliers to have policies and procedures in place to ensure that 3TGs used in the production of the products sold to Dentsply Sirona are DRC conflict-free. This means that the products must not contain 3TGs that directly or indirectly finance or benefit armed groups in the Covered Countries. The Company relies on direct suppliers to provide information on the origin of the 3TGs contained in components and materials supplied, including sources of 3TGs that are supplied to them from lower-tier suppliers.

Dentsply Sirona's Business Partner Code of Conduct applies to all direct suppliers and outlines certain expected behaviors and practices. This code of conduct is based on industry and internationally-accepted principles such as the United Nations Guiding Principles on Business and Human Rights and the OECD Due Diligence Guidance for Responsible Business Conduct. The Business Partner Code of Conduct is provided to all direct suppliers. If a supplier does not meet the Company's requirements, the relationship with this supplier will be evaluated. The Business Partner Code of Conduct is reviewed annually to ensure it continues to align with industry best practices.

Engagement with Suppliers

Dentsply Sirona has a strong relationship with direct suppliers. As an extremely important part of the supply chain, Dentsply Sirona has leveraged processes and educational opportunities in order to ensure non-English speaking suppliers have access to a free platform to upload their CMRTs, help desk support and other multilingual resources. Dentsply Sirona's suppliers are able to leverage 3E's team of supplier support specialists to ensure they receive appropriate support and understand how to properly file a CMRT. Suppliers are provided guidance in their native language, if needed.

The Company engages with suppliers directly to request a valid CMRT for the products that they supply to the Company. With respect to the OECD requirement to strengthen engagement with suppliers, Dentsply Sirona has developed an internal procedure that includes steps of supplier engagement escalation such as supplier meetings and corrective actions. Feedback from this engagement has allowed the Company to oversee improvements in supplier responses and supplier compliance for this initiative.

Dentsply Sirona believes that the combination of the Business Partner Code of Conduct, Conflict Minerals Policy, and direct engagement with suppliers constitutes a strong supplier engagement program.

Grievance Mechanism

Dentsply Sirona has a grievance mechanism whereby employees and suppliers can report concerns regarding the Company's business conduct and other matters.

Maintain Records

The Company has adopted a policy to retain relevant documentation for a period of at least five years. Through 3E, a document retention policy to retain conflict minerals related documents, including supplier responses to CMRTs and the sources identified within each reporting period, has been implemented. The Company stores all the information and findings from this process in a database that can be audited by internal or external parties.

2) Identify and Assess Risk in the Supply Chain

Risks associated with supplier CMRT content are identified automatically by 3E's software based on criteria established for supplier responses. These risks are addressed by 3E staff and members

of the Company's internal Conflict Minerals Compliance Team, who contact the supplier, gather pertinent data and perform an assessment of the supplier's conflict minerals status.

Risks at the supplier level may include non-responsive suppliers, incomplete CMRTs, or CMRTs that are submitted at the company level (i.e., a CMRT that provides data for all in-scope products that a company supplies to all customers as opposed to data only for those in-scope products that a company supplies to Dentsply Sirona). In those cases where a company-level CMRT is submitted, Dentsply Sirona is unable to determine if all the specified smelters and refiners were used for 3TGs in the products supplied to the Company. As a result, Dentsply Sirona may receive company-level CMRTs from suppliers in our multi-tiered supply chain that include specified smelters and refiners that may be subject to governmental sanctions, but Dentsply Sirona is unable to determine if such smelters and refiners were used for 3TGs in the products supplied to the Company. Dentsply Sirona remains committed to compliance with applicable sanctions laws and regulations and to working with our suppliers to mitigate the possibility of sourcing products that use 3TGs from sanctioned smelters and refiners.

Additionally, some suppliers indicated that they received information regarding their supply chains from fewer than 75% of their suppliers and, therefore, they could not provide a comprehensive list of all smelters or refiners in their supply chains.

Risks were identified by assessing the due diligence practices and status of smelters and refiners identified in the supply chain by upstream suppliers that listed mineral processing facilities on their CMRT declarations. Dentsply Sirona compared these facilities listed in the responses to the list of smelters and refiners consolidated by the Responsible Minerals Initiative ("RMI") to ensure that the facilities met the recognized definition of a 3TGs processing facility that was operational during the 2025 calendar year.

Dentsply Sirona determined if the smelter had been audited against a standard in conformance with the OECD Guidance, such as the Responsible Minerals Assurance Process ("RMAP"). Dentsply Sirona does not have a direct relationship with smelters and refiners and does not perform direct audits of these entities within their pre-supply chain. Smelters that have completed an RMAP audit are considered to be DRC conflict-free. In cases where the smelter's due diligence practices have not been audited against the RMAP standard or they are considered non-conformant by RMAP, follow-ups are made to suppliers reporting those facilities. Suppliers are encouraged to engage in their own independent risk mitigation actions, and our Tier 1 suppliers are monitored and addressed via our internal supplier risk policy. Additional escalation may have been necessary to address any continued sourcing from these smelters of concern. Suppliers are given clear performance objectives within reasonable timeframes with the ultimate goal of progressive elimination of these smelters of concern from the supply chain.

Suppliers are also evaluated on program strength, which assists in making key risk mitigation decisions as the program progresses. The criteria used to evaluate the strength of the program is based on certain questions in the CMRT related to the suppliers' conflict minerals practices and policies.

3) Design and Implement a Strategy to Respond to Identified Risks

Together with 3E, Dentsply Sirona developed processes to assess and respond to the risks identified in the supply chain. Dentsply Sirona has a risk management plan, through which the conflict minerals program is implemented, managed and monitored. As the program progresses, escalations are sent to non-responsive suppliers to outline the importance of a response via CMRTs and to outline the required cooperation for compliance to the conflict minerals rules and the Company's expectations.

Feedback on supplier submissions is given directly to suppliers and educational resources are provided to assist suppliers in corrective action methods or to improve their internal programs. The Company engages suppliers believed to be supplying 3TGs from sources that may support conflict in the Covered Countries to establish an alternative source of 3TGs that does not support such conflict, as provided in the OECD Guidance.

In cases where suppliers have continuously been non-responsive or are not committed to corrective action plans, the Company will assess if replacing that supplier is feasible. The results of the program and risk assessment are shared with the Conflict Minerals Compliance Team and senior management of Dentsply Sirona to ensure transparency within the Company.

4) Carry out independent third-party audit of supply chain due diligence

Dentsply Sirona does not have a direct relationship with any 3TG smelters or refiners and does not perform or direct audits of these entities within the supply chain. Instead, the Company relies on third-party audits of smelters and refiners conducted as part of the RMAP. The RMAP uses independent private-sector auditors, and audits the source, including the mines of origin, and the chain of custody of the conflict minerals used by smelters and refiners that agree to participate in the program.

5) Report Annually on Supply Chain Due Diligence

Dentsply Sirona has published the Form SD for the year ended December 31, 2025. This report is available on the Investor Relations section of the Company's website at <https://investor.dentsplysirona.com/financial-information/filings-reports>. Information found on or accessed through this website is not considered part of this report and is not incorporated by reference herein. Dentsply Sirona has also publicly filed a Form SD and this report with the U.S. Securities and Exchange Commission.

The Company has also considered the European Union Conflict Minerals Regulation when disclosing details with regards to its due diligence efforts. The Company will continue to expand efforts with respect to transparency through the data collection process and risk evaluation, as well as the public disclosure of its efforts.

Results of Due Diligence

Supply chain outreach is required to identify the upstream sources of origin of tin, tantalum, tungsten and gold. Following the industry standard process, CMRTs are sent to and requested from Tier 1 suppliers, who are expected to follow this process until the smelter and refiner sources are

identified. The following is the result of the outreach conducted by Dentsply Sirona for the 2025 reporting year.

Supply Chain Outreach Metrics

Year	Number of In-Scope Suppliers	Submission Rate	Invalid Submission Rate
2025	510	51%	16%
2024	290	65%	0%
2023	285	71%	1%
2022	297	71%	4%
2021	290	70%	2%
2020	340	72%	2%

Steps to be Taken to Mitigate Risk

Dentsply Sirona has taken, or intends to take, the following steps to improve the due diligence conducted to further mitigate any risk that the necessary 3TGs in the Company's products could benefit armed groups in the DRC or adjoining countries:

- Continue to evaluate upstream sources through a broader set of tools to evaluate risk. These include, but are not limited to:
 - Using a comprehensive smelter and refiner library with detailed status and notes for each listing.
 - Scanning for credible media on each smelter and refiner to flag risk issues.
 - Comparing the list of smelters and refiners against government watch and denied parties lists.
- Engage with suppliers more closely and provide more information and training resources regarding responsible sourcing of 3TGs.
- Encourage suppliers to have due diligence procedures in place for their supply chains to improve the content of the responses from such suppliers.
- Continue to include a conflict minerals flow-down clause in new or renewed supplier contracts, as well as included in the terms and conditions of each purchase order issued.

- Following the OECD Guidance process, increase the emphasis on clean and validated smelter and refiner information from the supply chain through feedback and detailed smelter analysis.

Smelter & Refiner Risk Evaluation

Understanding the risks associated with the smelters and refiners potentially providing material into Dentsply Sirona's supply chain is an important part of the due diligence process. This information is used to:

- Provide supplier feedback.
- Determine the health of the Company's overall program.
- Conduct outreach to smelters, refiners and their respective associations.
- Provide detailed analysis in this report.

The following risk categories are used for smelter evaluation and risk determination:

- Geo-Risk
 - Did the mineral originate from or has it been transported through a conflict-affected area as defined by Section 1502 of the Dodd-Frank Act (the DRC and its nine adjoining countries: Angola, Burundi, Central African Republic, Republic of the Congo, Rwanda, South Sudan, Tanzania, Uganda, and Zambia)?
- Audit Status
 - Has the refiner's due diligence practices been audited against a standard in conformance with the OECD Guidance?
 - We rely on the RMAP audit standard, including cross-recognition of the London Bullion Market Association ("LBMA") Good Delivery Program and the Responsible Jewelry Council Chain of Custody Certification, which are developed according to global standards including the OECD Guidance.
- Sourcing Risk
 - Has evidence of any other red flag that is supported by credible sources been identified?

Appendices

A list of the smelters and refiners and a list of the countries of origin of 3TGs reported to us in supplier CMRTs are attached hereto as APPENDIX A – Smelter and Refiner List and APPENDIX B – Countries of Origin.

APPENDIX A - Smelter and Refiner List
